Santa Cruz wood

SC grip

Unshaped pressing from the
5th DP model I scored from a
connection to SC.

Original molds were destroyed.
Surfboard dude who designed it
is dead.

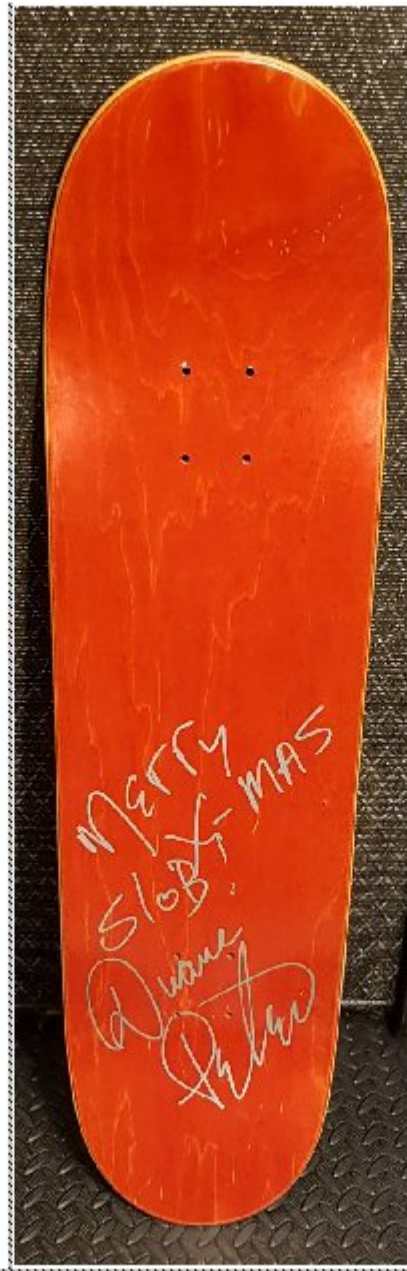

DP thought it was rad after riding it.
He signed it as well.

I traced out the shape of the
5th model on it after originaly
using the middle to tail shape
at both ends.

??? Grip

Owned and ridden almost to dust
by Jay Adams who left it in
Skip Engbloms pre-flooded garage.
It was a complete but it presented
better on the wall as just a deck.

I have one Natas left in

Skip's garage too...

now where is it?
